AMENDMENT

IN THE SPECIFICATION:

Please amend paragraph 50 as follows:

The actuator assemblies 10 and 110 described in Figures 1 to 3A can be used to move a component of an associated device, such as a component rod 331 of a vehicle door latch assembly 350 to change the state of the latch.

Please amend paragraph 53 as follows:

A known prior art latch is described in copending PCT application WO98/531565 which relates to power closing a vehicle door latch. Actuator assemblies according to the present invention can be used with this power closable latch as described in detail below.
